

Rain Barrel Workshop

Saturday, April 24, 2010, Noon-1:00 p.m.

Location: Friendship Park (next to the Civic Center)

Join us for an informative workshop that will teach you how to use rainwater to improve the condition of your yard and/or garden. Bridging the Gap is offering this workshop to teach you how to make a simple rain barrel and harvest some of that water that is so good for your flowers and lawn. For the \$45.00 Registration Fee you will receive the materials to build a rain barrel (to be built at the workshop). The barrels will need to be taken home at the conclusion of the workshop.

Did you know that the roofs of many houses in the Kansas City area receive 600 to 1,000 gallons of water with just an inch of rainfall?

The rainwater hits the roof, flows to the gutters, and pours out of your downspouts into the driveway or yard.

With an average of 37" of rainfall per year, tens of thousands of gallons of water could be harvested and used on your garden or lawn, reducing flooding of some rivers and water passages.

Spring Hill Family Fun Day RAIN BARREL WORKSHOP

Please print. One form per household.

Name: _____

Mailing Address: _____

City, State, Zip: _____

Phone: _____ Email: _____

Yes! I want to participate in the Rain Barrel Workshop
